

### 1. STAFF HYGIENE & PROTECTION

Before handling or preparing food, it's **crucial** to wash hands properly with soap and water for at least 20 seconds.

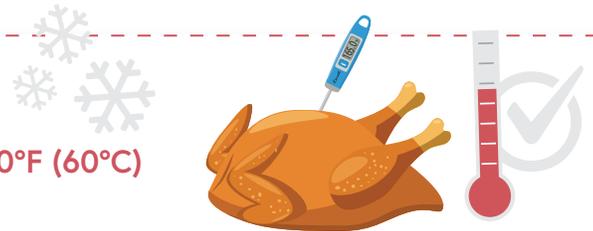

### 2. COLOR CODING & HACCP

A strict color-coded plan should be in place to avoid the risk of cross-contamination by dedicating specific colors to specific foods.

### 3. MANAGING SAFE TEMPERATURES

According to the CDC, **hot foods** should be kept at **140°F (60°C)** or warmer and **cold foods** at **40°F (4°C)** or colder.

### 4. DELIVERY SOLUTIONS

Whether you are in a healthcare environment or a traditional restaurant setting, safe food delivery is universal. Food needs to be kept at safe temperatures until delivery for healthy, hygienic consumption.

### 5. SURFACE CLEANING

All applicable food prep surfaces should be **cleaned and sanitized** before encountering any food.

## Employee Safety & Hygiene

Before handling or preparing food, it's crucial to wash hands properly with soap and water for at least 20 seconds.
