

## **CFS Brands Introduces New Efficient Air Curtain Refrigerator Doors and Eco-Friendly Refrigerant**

OKLAHOMA CITY, Okla., June 2, 2022 – CFS Brands – Dinex has added two operationally efficient door options to its air curtain refrigerators (ACR). The new tempered glass door increases labor and energy efficiency by eliminating the need to open the door when checking inventory. A new sliding stainless steel door makes the ACR accessible in facilities with space limitations. Both doors are available in left- and right- opening options.

Air curtain refrigerators use a horizontal and vertical air screen to keep food cold during extended operation, even when the door is open. They safely maintain food temperatures below 41 degrees Fahrenheit for up to two hours. ACRs are ideal for healthcare foodservice operations.

CFS Brands - Dinex is committed to protecting our environment by responsibly using clean technologies that replace harmful substances with more eco-friendly alternatives. CFS Brands has replaced refrigerant R404A with R452A in all of its air curtain units.

“CFS Brands - Dinex offers one of the only air curtain refrigerators that uses clean technology resulting in a global warming potential reduction of more than 45% compared to R404A refrigerant\*,” says Herve Boeglin, Group Product Manager, Meal Delivery at CFS Brands. “These are already DEO 2017 compliant, meaning reduced energy consumption. Add to that our new clear glass and sliding doors, and it becomes apparent why our ACRs give our foodservice clientele a competitive advantage.”

### **CFS Brands – Designing Value. Delivering Success.**
