

Booster Seat Press Release

Introducing the Newly Redesigned Booster Seats from CFS Brands — Carlisle Foodservice Products

OKLAHOMA CITY, Okla., August 26, 2021 – Today, CFS Brands – Carlisle FoodService Products, announced the launch of their new stackable booster seats. Their passion for design demonstrated again with the reinvention of their booster seats – a more sanitary and safer seat than its predecessor.

Acknowledging that children are inherently messy eaters, CFS Brands redesigned their booster seat with antimicrobial additives to inhibit bacteria growth, making it more sanitary for children and foodservice establishments to reuse. *“Our new booster seats have built-in antimicrobial protection and child straps that can be cleaned with an antibacterial wipe,”* states Laura Manson, Group Product Manager, Tabletop. Foodservice establishments can quickly clean the booster seat between uses – easily meeting today’s hygiene standards.

In addition to its hygiene benefits, these new boosters offer enhanced safety features, including elevated back support for young children and ASTM certified straps that effectively secure the child in the seat.

The new booster seats will replace their current seats (7114-101 and 7114-103). For more information, please visit: <https://www.carlislefsp.com/tabletop-accessories/stackable-booster-seats>
