

## Dinex Expands Disposable High-heat Meal Delivery Line with Exclusive Three-compartment Plate

OKLAHOMA CITY, Okla., - June 8, 2020 – Dinex®, a CFS Brands company, announces the expansion of its disposable high-heat meal delivery portfolio with the addition of a three-compartment plate to accommodate an entrée and two sides, making it easier to portion and separate food. The high-heat version of the 3-compartment plate is exclusive to Dinex.

The complete Dinex disposable high-heat product line meets emergency preparedness requirements and is ideal for times when dishwashing equipment is down or for areas where china dishes are not permitted.

The new plate fits the existing Dinex 9" high-heat dome and DuraTherm induction bases to hold temperature while delivering meals without replacing existing inventory making it both an economical and functional addition.

“Food plays a critical role in the rapid return of a patient to health, and that includes taste, temperature, and presentation of a meal. Our Dinex portfolio is perfect for hospitals endeavoring to leverage their culinary department to enhance patient satisfaction scores,” said Anthony Kehoe, CFS Brands VP of Sales and Marketing and global innovation leader.

The product development team worked closely with Registered Dietitians to ensure that the compartment sizes were appropriate for meal portions.

“While our current one compartment plate has been very successful, customers have been asking for a way to keep the food separated during meal delivery,” added CFS Brands Group Product Manager Laura Manson. “Many patients do not want their different foods to touch, plus the compartments make it easier to scoop food.”
