

## Dinex Releases Mobile Handwashing Station

**OKLAHOMA CITY, Okla., - June 3, 2020** – Dinex®, a CFS Brands company, today released a mobile handwashing station that will help schools safely welcome students back to campus. Portable handwashing also facilitates the return of outdoor and off-site foodservice for restaurants and catering services.

The mobile handwashing station leverages two five-gallon containers for fresh water and two six-gallon vessels for wastewater. It is fitted with an electric pump to enable up to 70 hot or cold hand-washes.

Constructed of stainless steel, the portable handwashing unit ships fully constructed and requires a 120V electrical outlet to operate the pump. Durable casters allow all-terrain use.

Optionally, the unit can be outfitted with side and backsplashes to minimize germ dispersal, as well as San Jamar® paper towel and soap dispensers.

Tony Sweeney, President of Piper Products, said, “As schools explore alternate means to safely provide meals to students outside of the traditional cafeteria, mobile handwashing is necessary if permanent facilities are unavailable or inconvenient.”

“For schools that need to provide mobile hand washing, the Dinex mobile handwashing station is the personal hygiene solution that helps enable schools to safely re-open per CDC recommendations,” added CFS Brands product manager Herve Boeglin.
